

All-female Culture

The next revolution in freshwater and marine shrimp farming

Why go all-female?

All-female freshwater shrimp *M. rosenbergii* are superior to traditional mixed culture in every performance parameter:

36% increase in yield

Outstanding Uniformity

Better survival

Up to 40 gr. average weight

Improved FCR

No males, no eggs
→ more growth

Product and Technology

Enzootic commercially supplies special super-female broodstock shrimp *M. rosenbergii*, guaranteed to spawn 100% female progeny, enabling farmers to grow all-female culture. This pioneering technology is protected by two patent families and was published in peer-reviewed journals^{1,2}.

About Enzootic

Enzootic is an animal biotechnology and genetics company, supporting breeding and farming of all-female freshwater and marine shrimp, while avoiding the use of chemicals, hormones and genetic modifications.
